

Ways to join wire together:

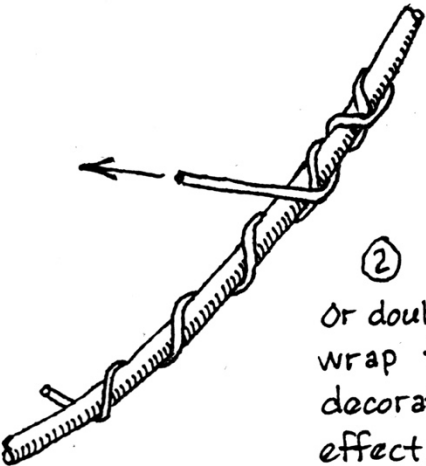

① You can wrap thin wire tightly around heavy wire....

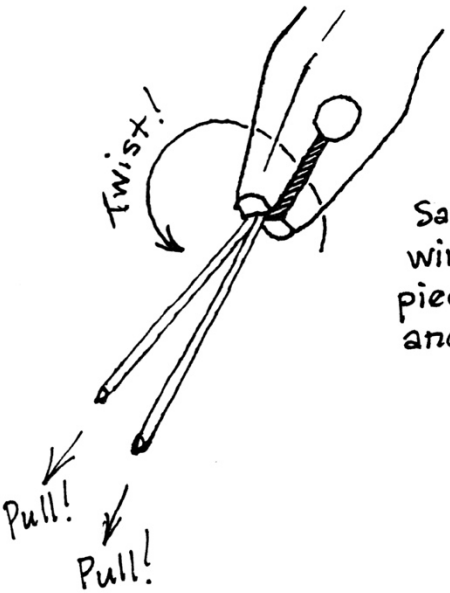

Wrap 8-16 times around

Pull TIGHT here!

② Or double-wrap for a decorative effect.

③ Same diameter wire - grab two pieces with pliers and twist...

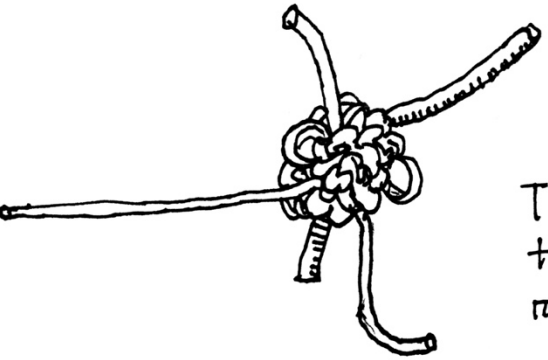

Twist!

Pull!

Pull!

... and voilà!

④ There's also the "big mess" method.

Whichever method you use, pull everything as tight as you can!
